We all strive for that close, clean shave... minus razor bumps and carnage, of course.

ShowerTek's Deluxe Clear View

Fog Free Shower Mirror magnifies as it filters some of your shower water, sends warmth out to your mirrors, then coiling the water back toward your shower nozzle. (It's the most high-tech shower ever!) Its nifty "thermal transer" circuit won't dribble any water, and it is very easy to set up and use.
