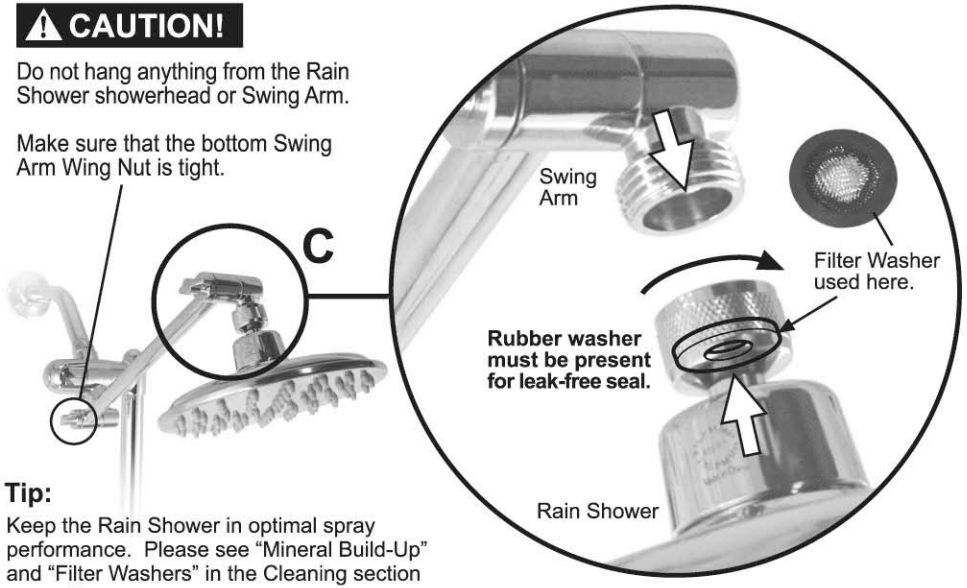
3 Connection C - Attach Rain Shower To Swing Arm

This connection should be leak free. If any leaking occurs after assembly, Please see Leak Free Connections, page 2.

⚠ CAUTION!

Do not hang anything from the Rain Shower showerhead or Swing Arm.

Make sure that the bottom Swing Arm Wing Nut is tight.

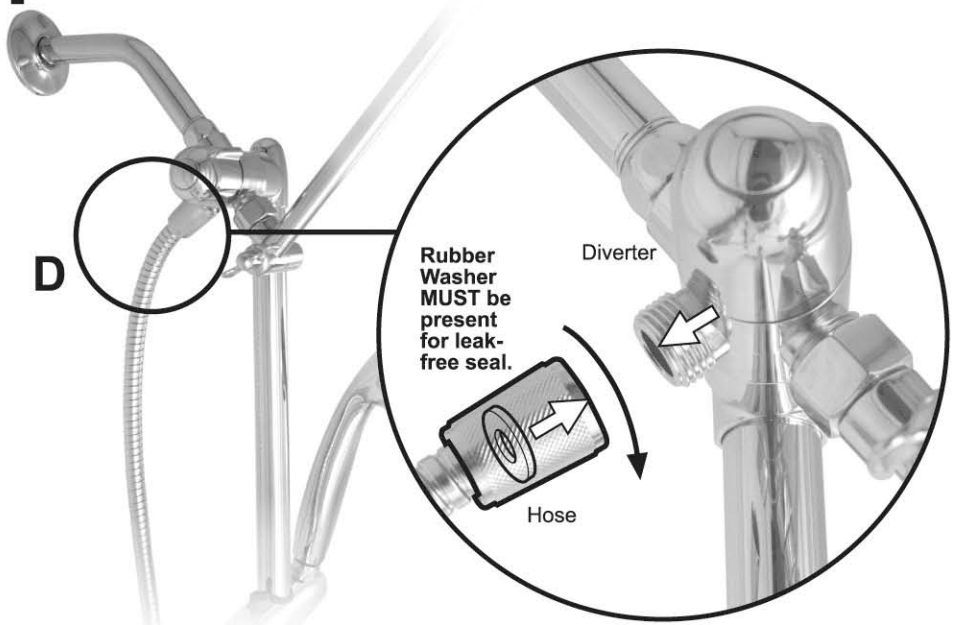


Tip:

Keep the Rain Shower in optimal spray performance. Please see “Mineral Build-Up” and “Filter Washers” in the Cleaning section - page 6.

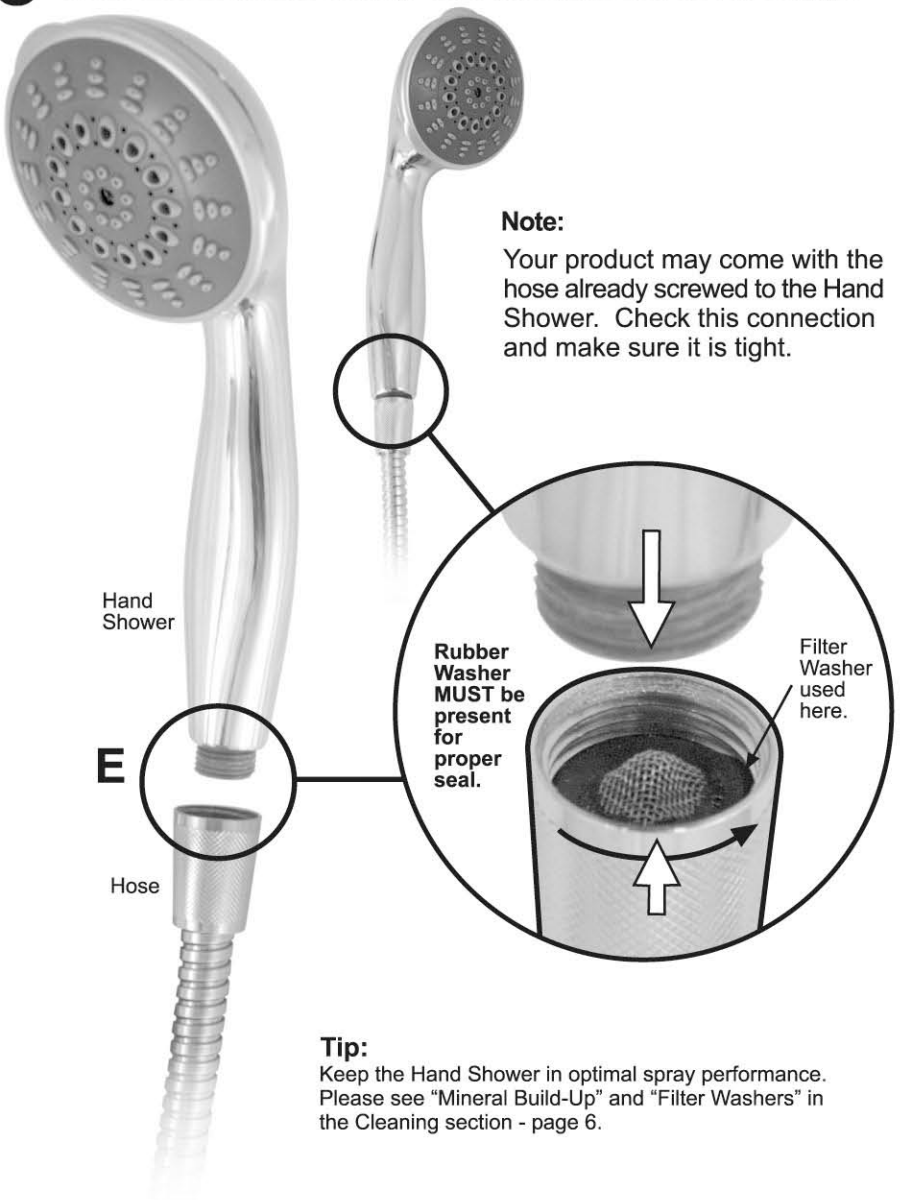
4 Connection D - Attach Hose To Diverter

This connection should be leak free. If any leaking occurs after assembly, Please see Leak Free Connections, page 2.



5 Connection E - Attach Hose To Hand Shower

This connection should be leak free. If any leaking occurs after assembly, Please see Leak Free Connections, page 2.



Note:

Your product may come with the hose already screwed to the Hand Shower. Check this connection and make sure it is tight.

Tip:

Keep the Hand Shower in optimal spray performance. Please see “Mineral Build-Up” and “Filter Washers” in the Cleaning section - page 6.
